EXPERIENCE

Software Developer

August 2024 – Present

FTI Consulting, Software Solutions, New York, NY

- Full-stack developer on 30-person Agile team (FTI's only internal engineering group) with ownership over the full development lifecycle
- Concurrently deliver large, complex features across three major projects without missed deadlines — an internal AI platform serving 8,000+ employees and two external client solutions — using Angular, Laravel, and React
- Built core platform features end-to-end, including a multi-phase data retention policy and real-time AI features (Skills, deep research, streaming responses) mirroring tools like ChatGPT and Claude
- Own AWS UAT/production deployments; use Terraform and CloudWatch to resolve requests and debug independently, integrate S3 and Amazon Bedrock for models, and serve as deployment backup across timezones
- Write SQL queries and scripts, run data analysis, and work with Excel data to support feature development and data accuracy
- Conduct code reviews, attend client meetings with direct client contact, and serve on UX, documentation, and learning taskforces — designed 10+ Figma pages for a site redesign, led technical workshops, and run a biweekly internal team learning series

Backend Developer Intern

May 2023 – August 2023

IBM, Sales Technology Engineering, New York, NY

- Worked on Agile full-stack project using Node, MongoDB, and React for Sales Cloud API & reporting dashboard
- Optimized prospecting list creation process to increase seller success rates
- Achieved third place in the division-wide intern project showcase with multiple successful presentations

Software Engineer Intern

May 2022 – August 2022

Solipay Tech, New York, NY

- Worked as a Full Stack Engineer in Mobile App Development at fintech startup with Agile methodology and weekly sprints
- Enhanced backend infrastructure by improving GCP logging, error handling, and testing; developed formatted email templates and SQL data manipulation workflows
- Utilized Xcode and React Native for iOS/Android UI/UX engineering including login/home screens, email verification, user onboarding, and data visualizations

EDUCATION

University of Virginia

May 2024

Charlottesville, VA

- **Bachelor's Degree:** Major: Computer Science, Minor: Data Science. **GPA:** 3.9/4.0
- **Leadership & Activities:** Undergraduate Teaching Assistant, School of Engineering (3 years) | UVA Student Council Member (2 years) | Recruitment Data Assistant, Kappa Alpha Theta (1 year) | Student Tutor (4 years)
- **Academic Projects:** Built AI game agents using Deep Reinforcement Learning, developed full-stack applications (Taxi Service, Fitness Tracker); Created interactive Tableau visualization mapping marriage percentages by state and geography across the US; implemented algorithmic solutions for real world problems

SKILLS

- **Languages:** Python, JavaScript, SQL, TypeScript, Java, C++, HTML/CSS, R
- **Frameworks & Libraries:** React, Laravel, Angular, Node.js, React Native, TensorFlow, NumPy, Pandas
- **Tools & Platforms:** AWS, Terraform, Figma, Git, Docker, Launch Darkly, Filament, WebSockets, GCP, MongoDB, PostgreSQL, Xcode, Excel, Outlook, Tableau, Adobe Photoshop/Illustrator
